construction of a tall apartment building. One of a series of Reading Laboratory Books for grades one to three. (This is first-grade level.)

Egg on Her Face, Imogene Smith. J. B. Lippincott Co., East Washington Square, Philadelphia 5; 1963. Clothbound. 190 pages. Price, $3.50.

The trials and troubles of teen-age life are portrayed in this story of Abigail Harker. Her sophomore and junior years include gay times as well. The author is a high-school teacher in Elgin.

Now That You Are Five, Charlotte Steiner. Association Press, 291 Broadway, New York 17; 1963. Hardbound. Illustrated. 57 pages. Price, $1.50.

For each child this year will bring new discoveries and skills and the wonder of growing up. This read-aloud story will give the child an idea of what kinds of things to expect. This is first in a series for each year up to 10. The books were developed in cooperation with the Child Study Association. (The books through age seven are to be read *to* children, and those from eight on are at their own reading levels.)

Science

Science Is Explaining, Wilbur L. Beauchamp et al. Scott, Foresman and Co., 433 East Erie Street, Chicago 11; 1963. Clothbound. Illustrated. 384 pages. Price, $3.96.

The problem-solving approach makes students "feel" what scientists go through. Special ability sections are provided as well as the basic fundamentals for seventh-grade science. Some 600 illustrations, 80 observations and experiments, and many definitions are special features. One of the Basic Science Program series for kindergarten through grade eight.

Adventures in Science, Harold R. Hungerford. J. Weston Walch, Publisher, Box 1075, Portland, Maine; 1962. Paperbound. Illustrated. 285 pages. Price, $3; quantity rates.

The project method in science education is thoroughly discussed, and advice is given on choosing and conducting a science project. Science games are provided, plus lists of supply houses and publications available. Other chapters concern field study, men in science, conquest of the unknown, and goals of science education. Written for the student in grades seven to 10, the book can also be helpful to the teacher.

Darwin and the Modern World View, John C. Greene. New American Library of World Literature, 501 Madison Avenue, New York 22; 1963. Paperbound. 128 pages. Price, 60 cents.

The areas of potential conflict between evolutionary science and the Bible have been sharply reduced by a slowly changing attitude toward the infallibility of the Bible on the part of both Protestants and Catholics, the author states. His discussion covers the impact of evolutionary biology on the religious and intellectual thought of the past century.

Social Studies

Guiding the Social Studies Reading of High School Students, Ralph C. Preston et al. National Council for the Social Studies, 1201 16th Street NW, Washington 6, D.C.; 1963. Paperbound. 79 pages. Price, $1.50.

In the face of automated instruction, the council has published this bulletin in defense of printed matter, which "still offers unparalleled opportunity for the weighing, selection, and analysis of ideas." The authors discuss: why reading in the social studies requires guidance, handling individual differences in reading ability, teaching how to read social studies texts, and stimulating different types of reading in the social studies.

The United States of America: A History for Young Citizens, Richard C. Brown et al. Silver Burdett Co., 4700 Chase Avenue, Chicago 46; 1963. Clothbound. Illustrated. 615 pages. Price, $5.40.

Picture essays in full color illustrate seven different historical eras in this text for grades seven and eight. Biographical sketches and many chapter-end reviews and exercises are also featured. Relationships between the past and the present are emphasized. One of the co-authors, Arlan Helgeson, is a history professor at Illinois State Normal University.

Concise Dictionary of American History, edited by Thomas C. Cochran and Wayne Andrews. Charles Scribner's Sons, 597 Fifth Avenue, New York 17; 1962. Clothbound. 1156 pages. Price, $19.50.

This reference book contains facts, events, places, trends, policies, and other phenomena in our American history. It is a one-volume abridgment of a popular 1940 series, *Dictionary of American History*. Some 2200 "articles" were prepared by 109 scholars; many are revisions from the earlier volumes.

Exploration of Africa, Thomas Sterling. A Horizon Caravel Book, published by American Heritage Publishing Co.; library and school distribution by Harper and Row, 2500 Crawford Avenue, Evanston. 1963. Clothbound. Illustrated. 153 pages. Price, $3.79.

The reader rides on a caravan across the Sahara, sails across Lake Tanganyika, takes river and sea voyages, and makes interior expeditions with 18th- and 19th-century European explorers. Illustrations include on-the-spot sketches, special maps, native art, full-color art, and contemporary photographs. This is the sixth in this series, for ages 10 and up, about world history, culture, and the arts.

Teaching Reading

Reading Improvement in the Junior High School, Deborah Elkins. Bureau of Publications, Teachers College, Columbia University, 525 West 120th Street, New York 27; 1963. Paperbound. 76 pages. Price, $1.25.

A special project with slow students is described as to principles, procedures, and materials used. Total-class, small-group, and individualized reading instruction were employed. The point is made that phonics (or other aspects) cannot be divorced from the total content.

New Trends in Reading Instruction, Shelley Umans. Bureau of Publications, Teachers College, Columbia University, 525 West 120th Street, New York 27; 1963. Clothbound. 145 pages. Price, $4.25.

Flexible grouping, team teaching, programed materials, and community resources are some of the new instructional approaches explained. The author suggests methods for application of these techniques. The book is primarily for reading consultants, supervisors, and teachers, but is also aimed at administrators who are exploring the field. Sample lesson plans and programed text materials are included.
